

## Skyline Series

Cardinal Shower Enclosures is pleased to announce the availability of our new Skyline series shower enclosures. This sleek enclosure is simple and elegant. One side has a fixed panel and the other side slides along on bold rollers and a single rod. The unit features 3/8" clear glass and a large 2 1/4" recessed finger pull.

Brand new type of shower enclosure

Can install almost anywhere a heavy glass slider could install

Sleek and architectural, while not overly modern

Amazingly smooth rollers

Breaks all the rules of a traditional slider

Without a header, side rails, or track, it can make your bathroom feel much larger
